ON JOB TRAINING (OJT)

TITLE: ON THE JOB TRAINING EXPERIENCE REPORT

CLASS: M.Sc.I.T. – Part I (2025-26)

SEMESTER: II

SUBMITTED BY (Name): Amaan Jabbar Sayyed

SEAT NUMBER: MIT251008

Under the esteemed guidance of Asst. Prof. Kirti Yadav

**SUBMITTED TO
DEPARTMENT OF INFORMATION TECHNOLOGY**

**Ms. Kirti Yadav
Subject In-charge**

**Mr. Mukesh Sharma
Coordinator**

**Dr. Sandeep Poddar
I/C Principal**

For Partial Fulfillment for Degree of
Master of Science (Information Technology) in 2025-26

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to my institute for providing me with the opportunity to undertake On Job Training (OJT) as a part of the M.Sc. IT Part-I Semester II curriculum. This opportunity has played a significant role in enhancing my practical knowledge and providing real-world industry exposure.

I am highly thankful to **Robonic Infotech** for giving me the opportunity to work as a Software Developer, where I gained valuable hands-on experience in a professional environment. During my training, I worked on real-time applications such as school ERP systems (IRIS School System), RoboCRM, and the development of a centralized RoboChurch system. This experience helped me understand real-world application development using technologies like ASP.NET WebForms (.NET Framework 4.7), SQL Server, JavaScript, and front-end integrations.

I would also like to express my heartfelt appreciation to my mentors and team members at Robonic Infotech for their constant guidance, support, and encouragement throughout the training period. Their valuable suggestions and continuous feedback helped me improve my technical skills, debugging abilities, and understanding of live project workflows.

Furthermore, I extend my gratitude to my faculty coordinator and the institute for their continuous support and guidance during the successful completion of my OJT and this report.

Finally, I would like to thank everyone who directly or indirectly contributed to making this learning experience meaningful and enriching.

INTRODUCTION ABOUT ORGANIZATION

About Organization – Robonic Infotech

Robonic Infotech is a software development and IT solutions company that focuses on building efficient, scalable, and user-friendly applications for educational institutions and organizational management. The company primarily specializes in developing ERP (Enterprise Resource Planning) systems, CRM solutions, and customized web-based applications that streamline daily operations and improve overall productivity.

One of the key products of Robonic Infotech is **EduSoft ERP**, a comprehensive school management system designed to handle various academic and administrative activities such as student management, admissions, fee collection, attendance, examinations, timetable management, and reporting. The ERP system is widely used by schools to digitize and automate their processes, ensuring accuracy, efficiency, and better data management.

In addition to ERP solutions, Robonic Infotech also works on applications like **IRIS School System**, which are advanced school management platforms with dynamic dashboards, reporting systems, and real-time data visualization. The organization has also developed **RoboCRM**, which is used for managing staff, enquiries, HR operations, and internal workflows, helping organizations maintain structured and centralized data management.

The company emphasizes real-time project development and practical exposure, allowing developers to work on live systems used by actual clients. The primary technology stack includes **ASP.NET WebForms (.NET Framework 4.7)**, **SQL Server**, **JavaScript**, **AJAX** and frontend technologies like HTML and CSS. Developers are involved in both frontend and backend development, database management, debugging, and system optimization.

During my association with Robonic Infotech, I gained hands-on experience working on live ERP and CRM systems. I contributed to modules such as dashboard development, dynamic calendar integration, report generation, database handling, bug fixing, and performance optimization. I also worked on enhancing existing systems and participated in the development of a centralized application called **RoboChurch**.

Through this training, I gained a clear understanding of how real-world enterprise applications are designed, developed, maintained, and optimized in a professional environment, along with improving my technical and problem-solving skills.

OBJECTIVES

The main objective of this On Job Training (OJT) was to gain practical exposure to real-world software development in enterprise-level applications. The training aimed to enhance my understanding of web-based application development using technologies such as ASP.NET WebForms (.NET Framework 4.7), SQL Server, and JavaScript, and to bridge the gap between theoretical knowledge and industry practices. It also helped me develop strong problem-solving skills and understand how real-world ERP and CRM systems are developed, maintained, and optimized in a professional environment.

- To gain hands-on experience in developing and maintaining web applications using ASP.NET WebForms and SQL Server.
- To understand real-world development workflows including frontend design, backend logic implementation, and database integration.
- To work on live projects such as school ERP systems (EduSoft ERP, IRIS School) and RoboCRM.
- To learn database operations including writing SQL queries, stored procedures, data handling, and optimization.
- To understand debugging, error handling, and performance improvement in live production systems.
- To enhance skills in creating dynamic dashboards, reports, and data-driven modules.
- To gain experience in implementing new features and modifying existing systems based on client requirements.
- To improve communication, teamwork, and professional work ethics in a real organizational environment.

ROLES & RESPONSIBILITIES

During my On Job Training at Robonic Infotech, I worked as a Software Developer and was actively involved in developing, maintaining, and enhancing real-time enterprise applications. My responsibilities included working on both frontend and backend development, understanding client requirements, and implementing features in existing ERP and CRM systems. This experience helped me gain practical knowledge of real-world application development and improved both my technical and professional skills.

I contributed to applications such as school ERP systems (EduSoft ERP, IRIS School), RoboCRM, and the development of a centralized RoboChurch system. My work involved user interface improvements, backend logic implementation, database management, debugging, and performance optimization in live production environments.

- Developed and enhanced web pages using ASP.NET WebForms (.NET Framework 4.7), HTML, CSS, and JavaScript to create responsive and user-friendly interfaces.
- Worked on backend logic and business processes using C# and integrated them with SQL Server databases.
- Performed database operations such as writing SQL queries, stored procedures, joins, and data handling for various modules.
- Worked on live ERP systems (IRIS School System) including dashboard development, dynamic calendar integration, and report generation.
- Contributed to RoboCRM by handling modules related to staff management, HR processes, enquiry handling, and access control.
- Implemented features such as QR code generation, file uploads (image, PDF, Word), and data export (Excel, PDF, ZIP).
- Identified and resolved real-time issues such as data mismatches, incorrect calculations, and system errors in production.
- Worked on improving system performance by optimizing queries and fixing logic errors.
- Assisted in developing new modules such as timetable upload pages and centralized system (RoboChurch).
- Collaborated with team members, followed coding standards, and implemented changes based on client requirements and feedback.

OJT UNDERTAKING

Student Name	Amaan Jabbar Sayyed
Current Address	Behind Mehru Manzil , Near Vaibhavi Villa, Church Road Marol Andheri East Mumbai 400059
Residence Address	Behind Mehru Manzil , Near Vaibhavi Villa, Church Road Marol Andheri East Mumbai 400059
Email ID	amaansayed63@gmail.com
Mobile No	8433829855
Aadhar Card	9127 8428 8270
PAN Card	
Overall GPA	
Mode of Internship	Work From Office
I confirm that I agree with the terms, conditions, and requirements of the OJT Policy. _____ Student Signature Date : _____	
I confirm that the student has attended the OJT orientation, and he has met all paperwork and process requirements to participate in the OJT programme and has received approval from his mentor. _____ Coordinator Date : _____	

RESUME

Amaan Sayyed

Software Developer

✉ amaansayed63@gmail.com ☎ +91 8433829855 🔗 Portfolio 📍 Andheri, Mumbai

🌐 Amaan63 🌐 amaansayed63

👤 PROFILE

Full Stack Developer with experience in building scalable web applications using modern frontend and backend technologies. Strong focus on clean code, performance, and efficient problem-solving.

🎓 EDUCATION

- **BSc-IT** 2022-25
SPDT College (Mumbai University) 9.3/10 CGPA

🧩 SKILLS

- **Frontend:** HTML, CSS, Bootstrap, TailwindCSS, JavaScript, ReactJS
- **Backend:** Java, Spring Boot, DotNET, NodeJS
- **Database:** MySQL, PostgreSQL, MongoDB
- **Tools:** Git/GitHub, Postman, Swagger, n8n

💼 PROFESSIONAL EXPERIENCE

Robonic Infotech, Junior Software Developer 🌐 08/2025 – Present

- Developed and maintained ERP and CRM modules using ASP.NET (C#) and SQL Server, improving automation and reporting efficiency.
- Designed and deployed SSIS packages for automated data migration, synchronization, and validation.
- Implemented data export systems (Excel, PDF, ZIP) with integrated QR code and photo management.
- Enhanced attendance, sales, and HR reporting through optimized SQL queries and stored procedures.
- Built and optimized responsive web interfaces using HTML, CSS, and JavaScript for better usability.
- Collaborated on database design, query optimization, and full-stack system integration.

MCM BPO, Python AI Developer 🌐 07/2025 – 08/2025

- Designed AI-driven automation workflows using n8n, integrating Google Sheets, Bing Search, and OpenAI APIs.
- Built keyword-website matching systems using AI for content relevance detection.
- Developed emotion-based content pipelines generating social media posts from live news sentiment.
- Created context-aware email generators for personalized communication.
- Integrated Vapi AI with n8n to build a voice assistant for Google Calendar and Sheets automation.
- Focused on AI orchestration, data synchronization, and API-based automation across multiple platforms.

INTERNSHIP OFFER LETTER

**Robonic Infotech**
Empowering Technology

To,
Amaan Sayyed
Room No 15, Neharu Manzil Chawl,
Marol Church Road, Near Garden Hotel,
Marol, Andheri East, Mumbai - 400 059.

18th September, 2025

APPOINTMENT LETTER

Dear Amaan,

We thank you for accepting our offer of employment based on our discussions. Following are accordingly, the terms of employment and conditions of service that we are pleased to offer to you.

1. **Date of Commencement**
 - 1.1. You are expected to report to your duties as from 18th September, 2025. Your bond is based on a period of one and half year after which we may renew it based on your performance.
2. **Job Title**
 - 2.1. Your job title will be **Software Trainee**.
3. **Allocated Place of Work**
 - 3.1. Your work location will be in Mumbai and you will report to HOD or any person nominated by the management. We may, at our discretion, require you to work at or to be transferred to any location in the county for the reason of effective execution of your assignment.
 - 3.2. The Company may, in fulfillment of its business interests, transfer you to any of its offices in India or abroad on such terms and conditions as are applicable to the transfer. Further, transfer shall be based on the needs of the organization, the employee's presence, position, and completion of their tenure, suitability for the posting. Although the Company will endeavor to assure that such transfer is in the mutual interest of you and the organization, the Company does not guarantee the continuation of any facility or perquisites in the place of your posting. All such cases of transfer will be governed by the Company's existing and laid down rules.

MONTHLY REPORT – JANUARY 2026

PROGRESS REPORT FOR THE MONTH OF JANUARY 2026		
Organization Name	Date of Report	Student Signature
Robonic Infotech	30/01/2026	
Name of Student	Amaan Jabbar Sayyed	
Reporting Person Name and Designation	Sanket, Team Leader	
Reporting Person's Contact Details	-	
Job Description and Responsibilities	During this month, I worked as a Software Developer and was mainly involved in maintaining and enhancing the RoboCRM system along with handling minor changes and fixes in demo school ERP projects. My work focused on understanding existing systems, debugging issues, and implementing required modifications based on client and internal requirements. I performed tasks such as fixing frontend and backend issues, working with SQL queries for data correction, and improving existing functionalities. I also handled small feature updates and ensured proper working of modules in live and demo environments. This month helped me build a strong foundation in understanding real-world application structure and debugging techniques.	
Technology Used during Internship	ASP.NET WebForms (.NET Framework 4.7) C# SQL Server JavaScript AJAX Visual Studio	
Overall Learning Experiences	Learning Experience	During this month, I gained practical exposure to working on existing enterprise applications. I improved my understanding of how real-world systems are structured and learned how to debug and fix issues in live projects.
	Skills Learnt	☐ Debugging and Issue Resolution ☐ SQL Query Writing and Data Handling ☐ Understanding Existing Codebase
	Knowledge Acquired	• Understanding of ERP architecture • Client-server interaction and API flow
Personal SWOC Analysis during Internship	Strength	☐ Quick learner ☐ Strong analytical thinking ☐ Good problem-solving skills
	Weakness	☐ Sometimes overthink solutions ☐ Limited initial understanding of large existing ☐ Limited initial understanding of large existing systems ☐ Tendency to focus too much on perfection
	Opportunities	Gained hands-on experience working on live CRM systems and real client requirements
	Challenges	Understanding existing codebase and debugging issues in a live production environment

MONTHLY REPORT – FEBRUARY 2026

PROGRESS REPORT FOR THE MONTH OF FEBRUARY 2026		
Organization Name	Date of Report	Student Signature
Robonic Infotech	26/02/2026	
Name of Student	Amaan Jabbar Sayyed	
Reporting Person Name and Designation	Sanket, Team Leader	
Reporting Person's Contact Details	-	
Job Description and Responsibilities	During this month, I worked on live school ERP systems such as IRIS School System along with RoboCRM. I was involved in developing new features, enhancing existing modules, and fixing real-time issues in production systems. My responsibilities included working on dashboard-related functionalities, handling data representation, and modifying system behavior based on client requirements. I also worked on database queries, improved data accuracy, and ensured proper functioning of different modules. Additionally, I contributed to backend logic updates and frontend improvements to enhance overall user experience. This month marked my transition from basic issue handling to working on more complex modules in ERP systems, including data processing, reporting logic, and system enhancements.	
Technology Used during Internship	ASP.NET WebForms (.NET Framework 4.7) C# SQL Server JavaScript AJAX Visual Studio	
Overall Learning Experiences	Learning Experience	During this month, I gained deeper exposure to live ERP systems and understood how large-scale applications handle real-time data, reporting, and user interactions. I improved my ability to implement changes in running systems without affecting existing functionality.
	Skills Learnt	☐ Working with Live ERP Systems (IRIS School) CRUD Operations ☐ Advanced SQL Query Handling and Data Processing
	Knowledge Acquired	☐ API integration in applications ☐ Knowledge of handling client-based requirements and system updates
Personal SWOC Analysis during Internship	Strength	☐ Ability to adapt to new modules and requirements ☐ Ability to work independently and in a team ☐ Better understanding of real-time systems
	Weakness	☐ Managing complex logic in large modules. ☐ Time required to understand interconnected systems
	Opportunities	Opportunity to work on live ERP systems and handle real client requirements
	Challenges	Handling complex data logic and ensuring accuracy in reports and dashboards

MONTHLY REPORT – MARCH 2026

PROGRESS REPORT FOR THE MONTH OF MARCH 2026		
Organization Name	Date of Report	Student Signature
Robonic Infotech	31/03/2026	
Name of Student	Amaan Jabbar Sayyed	
Reporting Person Name and Designation	Sanket, Team Leader	
Reporting Person's Contact Details	-	
Job Description and Responsibilities	During this month, I worked on advanced development tasks in IRIS ERP systems and contributed to the centralized RoboChurch system. I handled admission and examination modules, implemented backend logic, and ensured proper data flow between systems. I also resolved data inconsistencies, improved report accuracy, and assisted in system integration. This phase involved working independently on complex requirements and enhancing overall system functionality.	
Technology Used during Internship	ASP.NET WebForms (.NET Framework 4.7) C# SQL Server JavaScript AJAX Visual Studio	
Overall Learning Experiences	Learning Experience	During this month, I gained in-depth experience in handling complex modules and system integrations. I developed a better understanding of how large ERP systems manage multiple interconnected functionalities and how to implement scalable solutions.
	Skills Learnt	☐ Payment Gateway Integration ☐ Handling Complex ERP Modules (Admission & Examination) ☐ Debugging & Optimization
	Knowledge Acquired	☐ Understanding of admission and examination workflows in ERP systems ☐ Experience in integrating multiple modules within a single system ☐ Knowledge of centralized system architecture (RoboChurch)
Personal SWOC Analysis during Internship	Strength	☐ Strong problem-solving and debugging skills ☐ Strong analytical thinking ☐ Better understanding of system architecture ☐ Adaptable to new technologies
	Weakness	☐ Handling highly complex logic requires more time ☐ Need for further improvement in optimization techniques
	Opportunities	Opportunity to work on advanced ERP modules and centralized system development
	Challenges	Managing integration between multiple modules and ensuring data consistency across the system

STUDENT FEEDBACK OF OJT

Student Name : Amaan Jabbar Sayyed Date : _____Organization Supervisor : Sanket Kanagal Title : Team LeaderSupervisor Email : sanket@robonicinfotech.com OJT is : ☐ Unpaid ☐ Paid _____Organization : Robonic Infotech.Organization Address : Mumbai, MaharashtraDepartment : Information TechnologyDates of OJT : From : 27/01/2026 To : 17/03/2026

Give a brief description of your OJT work (title and tasks for which you were responsible) :

Was your internship experience related to your major area of study ?

☐ Yes, to a large degree.

☐ Yes, to a slight degree.

☐ No, not related at all.

Indicate the degree to which you agree or disagree with the following statements.

This experience has	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Given me the opportunity to explore a career field					
Allowed me to apply classroom theory to practice					
Helped me develop my decision making and problem-solving skills.					
Expanded my knowledge about the work world before permanent employment.					
Helped me develop my written and oral communication skills					
Provided a chance to use leadership skills (influence others, develop ideas with others, simulate decision making and action)					

This experience has	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
Expanded my sensitivity to the ethical implications of the work involved					
Made it possible for me to be more confident in new situations					
Expanded my sensitivity to the ethical implications of the work involved					
Made it possible for me to be more confident in new situations					
Given me a chance to improve my interpersonal skills					
Helped me learn to handle responsibility and use my time wisely					
Helped me discover new aspects of myself that I didn't know existed before					
Helped me develop new interest and abilities					
Helped me clarify my career goals					
Provided me with contacts which may lead to future employment					
Allowed me to acquire information and/or use equipment not available at my Institute					

In the Institute OJT program, faculty members are expected to be mentors for students.

Do you feel that your faculty coordinator served such a function? Why or why not?

The faculty coordinator provided necessary guidance during the OJT program by monitoring progress and offering general instructions. While most of the learning was self-driven, the support provided was helpful in completing the training successfully. More frequent interaction and detailed feedback could have further enhanced the overall learning experience.

How well were you able to accomplish the initial goals, tasks and new skills that were set down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

I was able to accomplish most of the initial goals and tasks outlined in my learning contract. I successfully applied my knowledge of full-stack development by working on real-world applications such as CRM and E-commerce systems. I also gained hands-on experience in API development, database integration, payment gateway implementation, and deployment using platforms like Vercel and Render, which helped me expand beyond the initial scope of learning.

In what areas did you most develop and improve?

During my OJT, I showed significant improvement in full-stack development and problem-solving skills. I enhanced my knowledge of React, Node.js, and MongoDB, and gained practical experience in building scalable web applications. I also improved my debugging skills, time management, and ability to handle real-world project requirements.

What has been the most significant accomplishment or satisfying moment of your OJT?

The most significant accomplishment during my OJT was successfully developing and deploying full-stack applications. Integrating the Razorpay payment gateway and deploying projects on platforms like Vercel and Render was a very satisfying experience, as it allowed me to build real-world, production-ready applications.

What did you dislike about the OJT?

One aspect I found challenging during the OJT was the limited level of continuous mentorship, which sometimes required extensive self-learning. However, this also helped me become more independent and improved my problem-solving abilities.

Considering your overall experience, how would you rate this OJT? (Circle one).

Satisfactory / Good / Excellent

Give suggestions as to how your OJT experience could have been improved. (Could you have handled added responsibility? Would you have liked more discussions with your professor concerning your OJT? Was closer supervision needed? Was more of an orientation required?)

The OJT experience could have been improved with more regular mentorship sessions and detailed feedback. A structured orientation at the beginning and more collaborative discussions would have enhanced the learning process. I also feel I could have taken on additional responsibilities to gain deeper practical exposure.
