

Microservice Architecture Research Paper Topics

Sem-2

Roll No	Topic
801	Role of Containers (Docker) in Microservices
802	Service Discovery in Microservices Architecture
803	
804	Microservice Boundaries and Bounded Context
805	Data Management in Microservices Systems
806	Event Sourcing in Microservices
807	CQRS Pattern in Microservices
808	Independent Deployability in Microservices
809	Monitoring in Microservices Systems
810	Continuous Delivery in Microservices
811	Asynchronous Message Passing in Microservices
812	API Design for Microservices
813	Standardization and Coordination in Microservices
814	Goals and Principles in Microservices
815	Dealing with Dependencies in Microservices
816	Hypermedia API Design in Microservices
817	Monitoring and Alerting in Microservices
818	Adopting Microservices in Practice
